Previous Teaching / Administrative Experience

Over ten years of teaching experience at Grayson College in the Nursing Department. Subject areas include; Perioperative, Gastro-Intestinal, Advanced Pain Management, Congenital Cardiac, Enteral, and Parenteral Therapy, Respiratory, Malnutrition, Central Catheter Management, Chest Trauma, Addictions, Leadership, Delegation, and Fluid, and Electrolyte Balance.

Two and one-half years of senior management experience as the Associate Dean for Operations, managing the operation center for the Academy of Health Sciences, Fort Sam Houston, Texas. The

Academy is the world's largest allied health training organization, providing Doctorate (Ph.D.) to certificate level training to over 30,000 students annually.

As the chief clinical consultant, I worked with architects, engineers, and information management personnel in the layout and design of a \$20M Nursing Science building and a \$12M hospital renovation project involving the surgical suites, Same-Day Surgery, Post Anesthesia Care Unit, Intensive Care Units, and Medical-Surgical Ward. The Nursing Science Building was completed six months ahead of schedule and is currently being used to train Licensed Vocational Nurses, Registered Nurses, and Certified Registered Nurse Anesthetist.

Two years as the project manager for the U.S. Army's first Patient Safety Program, at a medical treatment facility.

As Director of Nursing, I lead 100+ nurses and ancillary staff in the day to day operations for all nursing services.

Appointed as the Senior Project Officer to supervise and direct the collection and collation of data for the entire Army Medical Department, in support of the Base Realignment and Closure Commission. The work helped support the Commission's decision to select San Antonio, Texas, as the sole medical training site for all branches of the armed services.

Chosen to represent the Academy of Health Sciences at a strategic off-site to help formulate the plan to transition the Army Medical Department Center and School into the Joint Medical Training Center.

Supervised, planned, and implemented over 100 visit itineraries for Congressional leaders, senior government officials, general officers, and foreign dignitaries.
